

Establishing an Effective Corrective and Preventive Action (CAPA) Program

Course Description

Establishing an Effective Corrective and Preventive Action (CAPA) Program is a well-known regulatory concept that focuses on investigating, understanding, and correcting discrepancies while attempting to prevent their recurrence. This half-day course summarizes a simple, straight-forward way to implement a CAPA program which is structured through a six step cyclical approach. Package which is available for download in .zip file format is a complete lesson plan and associated course materials, which includes Power Point presentation, student handouts. This product is designed to be delivered by your in house training staff and is the same course presented by Delphi Analytical Personnel at various client sites around the country. All you have to do is provide the instructor!
